Election/Restrictions

The examiner has considered the response to a restriction requirement filed by applicant on December 4, 2006. In said response, applicant amended the claims, thereby rendering the restriction moot; as such, all pending claims, i.e., claims 1-15, were examined together.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the instant claims are drawn to a compound of formula (2) and a method of preparing said compound; a compound of formula (1) and a method of preparing, and to the use of the compound of formula (1) in a composition, and in a method of imparting a fragrance or flavor to a substance. The closest prior art of record, i.e., references listed on the attached PTO-892 and PTO-1449, fail to teach or fairly suggest the compound of formula (2) or a process of making said compound. The references teach compounds that are in some instances homologues of the compound of formula (1), i.e., they lack the methyl group attached at the 2-position as in the instant compound of formula (1) (see Andrus et al, Bechtold et al, and Burke et al, for example). However, these references either teach no use for said homologous compounds, or teach said homologues as in intermediate in making other compounds. The references neither provide nor suggest any motivation to modify said homologues to arrive at the compound of formula (1) of the instant invention. *In re Lalou and Foulletier*, 223 USPQ 1257 (Fed. Cir. 1984). As such, the instant claims are allowed.
